Klucz aktywacyjny TETRA GSSI do AOR AR-DV1 AR-DV10

Po opłaceniu zamówienia prosimy o podanie numeru seryjnego odbiornika oraz jego modelu.

Instrukcja aktywacji w galerii.

➤ **Optional PRO feature: Tetra GSSI user group filtering** (since v. 2101A)

(This PRO feature is fitted as standard on the high-end AR5700D receiver, but a chargeable option for the AR-DV10.)

- To activate this PRO feature, first you have to purchase an activation key at: <https://www.aordirect.jp/>. Then, the 15-digit activation key has to be registered into your receiver as follows.

Press MENU+5+9

Input the 15-digit key via the numeric keypad. After the last digit has been input, the screen will be automatically reverted to the standard VFO mode.
Reboot the receiver

To check if activation has been successful:

Press MENU+7+left arrow

If a "T" amends the firmware version number (for ex. 2101A**T**), activation has been successful.

If unsuccessful, re-enter carefully the activation code as described above.

The activation code will remain in memory even after a firmware update (to a higher version), a system reset and a full reset.
