Opis produktu

**ELS 27 + oprogramowanie FORScan
interfejs do diagnostyki Ford Mazda Lincoln Mercury**

Kabel ELS-27 FORScan do wszystkich samochodów marek:

- Ford
- Mazda
- Lincoln
- Mercury.

Protokół komunikacji uwzględnia powyższe marki - tam gdzie większość adapterów nie łączy się bądź odczytuje dane tylko z silnika tam ELS-27 komunikuje się sprawnie i bezproblemowo z wieloma modułami.

Przy zastosowaniu tego interfejsu i odpowiedniego oprogramowania możesz go używać np. do:

- odczytu wszystkich modułów elektronicznych
- diagnostyki
- kasowania błędów, inspekcji
- kodowania dodatkowych funkcji
- wypalania statycznego DPF
- kodowania kluczy, immobilizera
- aktualizacji sterowników
- wykonywania adaptacji
- wyłączenia poduszek powietrznych.

Kabel ELS27 z jednej strony zakończony jest złączem OBD-II a z drugiej strony złączem USB

(do komputera).

Długość kabla połączeniowego ok. 100cm.

Aplikacja jest na płycie kompaktowej dołączonej do interfejsu.

Oprogramowanie działa na komputerach z Windows 2000, XP, Vista, 7, 8 oraz 10.
